Reflexology Learn How to Use Reflexology With Easy Techniques and Simple Instruction

When referring to reflexology people are talking about the process of applying pressure to specific areas of the hands and feet or even the ear. In essence, it is a form of therapeutic massage, based on the theory that there are pathways from the hands, feet and ears to other parts of our body, through which we can direct positive, healing energy. Neither lotion nor oil is used in the practice and the ways by which the pressure is applied depends upon the area you is trying to address. The idea is that certain areas of the ears, feet and hands, known as reflex points, correspond to organs and limbs on the body. Massaging the correct spots on the ear, foot or hand in the right way is believed to relieve pain in those matching areas of the body.

These techniques are especially needed in the field of intelligence analysis where analysts typically deal with incomplete, ambiguous and sometimes deceptive information. A standard text in a variety of courses, the Techniques Manual, as it is commonly called, covers every aspect of modern wildlife management and provides practical information for applying the hundreds of methods described in its pages. To effectively incorporate the explosion of new information in the wildlife profession, this latest edition is logically organized into a two-volume set: Volume 1 is devoted to research techniques and Volume 2 focuses on management methodologies.
