Children of almost any age can break the law, but at what age should children first face the possibility of criminal responsibility for their alleged crimes? This work is the first global analysis of national minimum ages of criminal responsibility (MACRs), the international legal obligations that surround them, and the principal considerations for establishing and implementing respective age limits. Taking an international children's rights approach, with a rich theoretical framework and the vitality of the UN Convention on the Rights of the Child, this work maintains a critical perspective, such as in challenging the assumptions of many children's rights scholars and advocates. Compiling the age limits and statutory sources for all countries, this book explains the broad historical origins behind most of them, identifying the recurring practical challenges that affect every country and providing the first comprehensive evidence that a general principle of international law requires all nations, regardless of their treaty ratifications, to establish respective minimum age limits. This book addresses one of the core challenges in the corporate social responsibility (or

business and human rights) debate: how to ensure adequate access to remedy for victims of corporate abuses that infringe upon their human rights. However, ensuring access to remedy depends on a series of normative and judicial elements that become highly complex when disputes are transnational. In such cases, courts need to consider and apply different laws that relate to company governance, to determine the competent forum, to define which bodies of law to apply, and to ensure the adequate execution of judgments. The book also discusses how alternative methods of dispute settlement can relate to this topic, and the important role that private international law plays in access to remedy for corporate-related human rights abuses. This collection comprises 20 national reports from jurisdictions in Europe, North America, Latin America and Asia, addressing the private international law aspects of corporate social responsibility. They provide an overview of the legal differences between geographical areas, and offer numerous examples of how states and their courts have resolved disputes involving private international law elements. The book draws two preliminary conclusions: that there is a need for a better understanding of the role that private international law plays in cases involving transnational elements, in order to better design transnational solutions to the issues posed by economic globalisation; and that the treaty negotiations on business and human rights in the United Nations could offer a forum to clarify and unify several of the elements that underpin transnational disputes involving corporate human rights abuses, which could also help to identify and bridge the existing gaps that limit effective access to remedy. Adopting a comparative approach, this book appeals to academics, lawyers, judges and legislators concerned with the issue of access to remedy and reparation for corporate abuses under the prism of private international law. The Penal Code of California forms the basis for the application of criminal law within the state of California. It was originally enacted in 1872 as one of the original four California Codes, and has been substantially amended and revised since then. This book contains the following parts: Part 1 - Of Crimes and Punishments, Part 2 - Of Criminal Procedure Accessible au grand public depuis plus de vingt ans, Internet sert souvent de vecteur pour la commission de délits, parce qu'il permet l'anonymat, ne connaît pas de frontière et met en jeu un nombre considérable d'acteurs, dans des rôles très différents. Ces éléments rendent difficile la poursuite pénale et la détermination de la responsabilité des différents intervenants. La présente étude a pour but de proposer quelques pistes de réflexion en définissant les principaux fournisseurs de service et en déterminant leur responsabilité pénale en droit suisse, en s'inspirant des solutions développées en Allemagne et en France. Cet ouvrage est destiné aux étudiants, aux praticiens et à toute personne qui s'intéresse à la question de la responsabilité pénale des différents prestataires actifs sur Internet. This book provides a current analysis of the legal and ethical challenges in preparing for and responding to chemical, biological, radiological, nuclear and explosive (CBRNE) crises. From past events like the Chernobyl nuclear incident in Russia or the Bhopal chemical calamity in India, to the more recent tsunami and nuclear accident in Japan or the Ebola crisis in Africa, and with the on-going threat of bioterrorism, the need to be ready to respond to CBRNE crises is uncontroversial. What is controversial is whether we are on a path that adequately prepares us for the next event. The ethical and legal scholars in this volume hold that much work remains to be done and offer this book to stimulate further reflection and dialogue around CBRNE crises. This is an indispensable book for both students and scholars of bioethics, international law, public health, as well as for regulators and administrators developing policy and legislation related to public health planning and emergency responses. This book examines responsibility in criminal law across categorization, frameworks for understanding criminal responsibility and the relationships between them, women in criminal law, the history of criminal law, blameworthiness and ascriptions of responsibility, moral responsibility, the role of politics and political economy. The law of international responsibility is one of international law's core foundational topics. Written by international experts, this book provides an overview of the modern law of international responsibility, both as it applies to states and to international organizations, with a focus on the ILC's work. This is the California Penal Code for 2014. It also includes the Evidence Code. The entire set of laws are included, and is current up until January 1, 2014. This is book 1 of 2. Book 2 is

also available. We've tried to make these books as economical for the reader as possible. We're fed up with overly expensive legal books, and we've heard from many who are, too. Atrocities such as genocide or crimes against humanity are usually committed by a large number of perpetrators spread out over a considerable area. Moreover, those who masterminded the crimes may not have actively participated in them. This book sets out how these people can be held responsible for their crimes by international criminal tribunals. Anchored by the normative framework, this book aims to clarify the basis for individual criminal liability for persons who finance entities that perpetrate core crimes. The objective of this monograph is to clarify the rules to enable international courts and tribunals to identify the extent to which individual criminal liability attaches to the financing of core crimes, as well as the legal basis for such liability. By clarifying the criminal liability of individual who finance entities that perpetrate core crimes, this book also seeks to clarify the mental elements of the mode of liability of aiding and abetting. This is achieved through a thorough analysis of the applicable rules in the international arena, as well as through the comparative analysis. The adage 'ignorance of the law is no excuse' is significantly inaccurate. Ignorance and mistake of law do, under certain circumstances, exclude responsibility both in national and international criminal law. This monograph updates the existing reviews of law and practice on the topic, aiming to go a step further: it takes the analysis of mistake of law as a starting point for systematic observations about international criminal law in general. First, the volume defines the contours of the defence of mistake of law in general theory of criminal law, distinguishing it from cognate defences and highlighting, most notably, its connection with superior orders. Secondly, it gives an overview of the possible approaches to the defence, offering examples from national law as terms of reference for the subsequent analysis of international criminal law. Thirdly, it surveys the relevant law and practice of international criminal tribunals, with a focus on the International Criminal Court, and it contemplates offences for which a defence of mistake of law may potentially succeed. Finally, the author tries to interpret what the rules on mistake of law applicable before international criminal tribunals imply about the purpose of punishing individuals and to the legitimacy of such punishment. Whilst the discourse on international criminal law is more and more concerned with global politics, *The Defence of Mistake of Law in International Criminal Law* brings back the focus on the appropriateness of imposing a guilty verdict on the individual defendant, a human being constituting the basic unit of each society. Excerpt from *Questioni di Diritto su Casi Controversi Esaminati e Discussi: Successione, Cittadinanza, Collazione, Comitiva Armata, Responsabilita Civile, Responsabilita Penale, Competenza, Giurisdizione, Esecuzione di Sentenze Estere, Urto di Navi, Naufragio, Pagamento della Dote, Consiglio di Famiglia, Curatore al Minore, Ecc Elementi DI diritto Costituzionale e Amministrativo (cremona 1862) (murito). "Environmental crime is a growing challenge for policy makers and law enforcers. This is an important and timely study which examines in depth how environmental crime is treated at national level within the European Union and the impact of the 2008 EU Directive on environmental crime on national systems. It will be required reading by anyone concerned with making environmental law more effective." Richard Macrory, Emeritus Professor, University College London The aim of this important new collection is to explore how environmental crime is controlled and environmental criminal law is shaped and implemented within the European Union and its Member States. It examines the legal framework, looking in particular at Directive 2008/99/EC, and the specific competences of the EU in this domain. In addition, it provides a detailed analysis of environmental criminal law in seven Member States, focusing inter alia on the

basic legislation, the way in which environmental pollution is criminalised and the main actors in place to enforce environmental criminal law. In so doing, it provides a much needed explanation of the evolution of environmental criminal law in Europe at Union level and how this is implemented in selected Member States. This book offers a unique comparison between state and individual responsibility for international crimes and examines the theories that can explain the relationship between these two regimes. The study provides a comprehensive and systematic analysis of the relevant international practice from the standpoint of both international criminal law, and in particular the case law of international criminal tribunals, and state responsibility. The author shows the various connections and issues arising from the parallel establishment of state and individual responsibility for the commission of the same international crimes. These connections indicate a growing need to better co-ordinate these regimes of international responsibility. The author maintains that a general conception, according to which state and individual responsibility are two separate sets of secondary rules attached to the breach of the same primary norms, can help to solve the various issues relating to this dual responsibility. This conception of the complementarity between state and individual responsibility justifies co-ordination and consistent application of these two different regimes, each of which aims to foster compliance with the most important obligations owed to the international community as a whole. How does international law respond to situations where collective entities order, encourage or allow the committing of international crimes? "Le Code annoté de la Cour pénale internationale" (2008) est le troisième volume d'une collection annuelle. Il propose une sélection des extraits les plus pertinents résultant de l'analyse de 472 décisions de la Cour en 2008. I rischi, le sanzioni, gli obblighi e le conseguenze di natura penale e amministrativa per tutti coloro che sono impegnati a rispettare le norme sulla tutela della salute e della sicurezza sui luoghi di lavoro. Un volume essenziale, dal taglio pratico e scevro da tecnicismi, che offre un quadro completo delle responsabilità previste dalla legge e innovate con il D.Lgs. 81/08. Il libro offre un panorama completo delle disposizioni a carico del datore di lavoro, dei dirigenti e preposti, del medico competente, del responsabile del servizio di prevenzione e protezione e del lavoratore. Non meno importante la descrizione, nel dettaglio, delle sanzioni amministrative, pecuniarie ed interdittive stabilite per gli enti nel D.Lgs. n. 231/2001 e la loro applicabilità ai delitti in materia di salute e sicurezza sul lavoro. Il testo si sofferma, inoltre, sugli effetti derivanti dalla adozione ed attuazione dei modelli organizzativi, anche ai fini del dovere di sorveglianza da adempiere in caso di delega di funzioni. In conclusione, uno strumento pratico, utile a tutti i soggetti coinvolti nella gestione della sicurezza nelle aziende, e facilmente comprensibile anche dagli operatori economici privi di specifica esperienza nel campo del diritto. Drawing on the expertise and experience of contributors from a wide range of academic, professional and judicial backgrounds, this handbook critically analyses the laws, policies and practices that govern detention, punishment and the enforcement of sentences in the international criminal justice context. Comprehensive and innovative, it also explores broader normative questions related to international punishment and makes recommendations for the international penal system's development. The Limits of Criminological Positivism: The Movement for Criminal Law Reform in the West, 1870-1940 presents the first major study of the limits of criminological positivism in the West and establishes the subject as a field of interest. The volume will explore those limits and bring to life the resulting doctrinal, procedural, and institutional compromises of the early twentieth century that might be said to have defined modern criminal justice administration. The book examines the topic not only in North America and western Europe, with essays on Italy, Germany, France, Spain, the United Kingdom, Belgium, and Finland but also the reception and implementation of positivist ideas in Brazil. In doing so, it explores three comparative elements: (1) the differing national experiences within the civil law world; (2) differences and similarities between civil law and common law regimes; and (3) some differences between the two leading common-law countries. It interrogates many key aspects of current penal systems, such as the impact of extra-legal scientific knowledge on criminal law, preventive detention, the 'dual-track' system with both traditional punishment and novel measures of security, the assessment of offenders' dangerousness, juvenile justice, and the indeterminate

sentence. As a result, this study contributes to a critical understanding of some inherent contradictions characterizing criminal justice in contemporary western societies. Written in a straight-forward and direct manner, this volume will be of great interest to academics and students researching historical criminology, philosophy, political science, and legal history. This book examines the concept of individual criminal responsibility for serious violations of international law, i.e. aggression, genocide, crimes against humanity and war crimes. Such crimes are rarely committed by single individuals. Rather, international crimes generally connote a plurality of offenders, particularly in the execution of the crimes, which are often orchestrated and masterminded by individuals behind the scene of the crimes who can be termed 'intellectual perpetrators'. For a determination of individual guilt and responsibility, a fair assessment of the mutual relationships between those persons is indispensable. By setting out how to understand and apply concepts such as joint criminal enterprise, superior responsibility, duress, and the defence of superior orders, this work provides a framework for that assessment. It does so by bringing to light the roots of these concepts, which lie not merely in earlier phases of development of international criminal law but also in domestic law and legal doctrine. The book also critically reflects on how criminal responsibility has been developed in the case law of international criminal tribunals and courts. It thus illuminates and analyses the rules on individual responsibility in international law. This book presents the results of a two-year international research project conducted for the United Nations Office on Drugs and Crime (UNDOC) to investigate and provide solutions for reducing bribery and corruption in corporations and institutions. It starts with an empirical case study on the effectiveness of a set of self-regulation rules adopted by multinational companies in the energy sector. Second, it explores the context and factors leading to corruption internationally (and the relationships between domestic criminal law and self-regulation). Third, it examines guidelines for the adoption of compliance programs developed by international institutions, to serve as models for the future. The principle result of the book is a three-pronged Anti-Bribery Corruption Model (so called ABC Model), endorsed by the United Nations, intended as a corruption prevention tool intended to be adopted by private corporations. This work provides a common, research-based standard for anti-bribery compliance programs, with international applications. This work will be of interest to researchers studying Criminology and Criminal Justice, particularly in the areas of organized crime and corruption, as well as related areas like Business Ethics and Comparative International Law. This book discusses the many legal aspects arising in relation to the maintenance of peace in Africa. Over the past twenty years, the majority of peace operations have been deployed on this continent, most of them established by the UN Security Council, sometimes in cooperation with the African Union and other African regional organizations, with contributions from the European Union and NATO. In some cases, the African Union has invoked its 'primary responsibility for promoting peace, security and stability in Africa', thus questioning the legal partnership between UN and regional organizations provided for in Chapter VIII of the UN Charter. The peace operations deployed in Africa have sometimes received a very robust mandate, which also includes the use of force and the protection of civilians' human rights. The implementation of this broad mandate, which goes well beyond the traditional 'peacekeeping approach', requires considerable human and economic resources. Moreover, it raises several issues of concern with regard to the impact on the economic and political systems of the states in which the operations are deployed and, more generally, on the exercise of sovereignty over their territorial communities by these states. Offering an update for lawyers in practice and in academia interested in the field of international law, the book also contributes to the theoretical studies concerning the activities of international organizations, focusing on one of the most challenging issues to emerge in recent times. This book examines the responsibility of States and international organizations for complicity (aid or assistance) in an internationally wrongful act. Despite the recognition of responsibility for complicity as a rule of customary international law by the International Court of Justice, this book argues that the effectiveness and utility of this form of responsibility is fraught with systemic and operational limits. These limits include a lack of clarity in its constituent elements, its co-existence with primary rules prohibiting

complicity and the obligations of due diligence, its implementation and the underlying causal tests, its uncertain relationship to other forms of shared and indirect responsibility, and its potential as a form of attribution of conduct. This book submits that the content and elements of this form of responsibility need adjustments to respond more effectively to the phenomenon of complicity in international affairs. Awarded The Paul Guggenheim Prize in International Law 2017! Les Éditions Anthemis vous proposent un outil complet pour comprendre la responsabilité civile et pénale des administrateurs et des membres du comité de direction des sociétés anonymes. Dans cet ouvrage, l'auteur dresse l'état des lieux actuel de la responsabilité des administrateurs et des membres du comité de direction des sociétés anonymes, tant en matière civile qu'en matière pénale. À travers une synthèse riche et complète, sont ainsi présentées : - les caractéristiques de l'administration de la société anonyme (responsabilités, mandat, conseil d'administration, administrateurs) ; - les responsabilités à l'égard de la société anonyme qui découlent de cette mission administrative, la violation des règles pénales générales et les infractions civiles ; - la responsabilité de l'administrateur à l'égard des tiers (la faute, le dommage, le lien de causalité) ; - les responsabilités civiles et pénales des détenteurs de délégations particulières à l'égard des tiers ; - la mise en application de la responsabilité des administrateurs. Cet ouvrage intéressera toutes les personnes désireuses d'obtenir un panorama global de la responsabilité des dirigeants de sociétés anonymes. Un ouvrage écrit par des professionnels, pour des professionnels. À PROPOS DES ÉDITIONS ANTHEMIS Anthemis est une maison d'édition spécialisée dans l'édition professionnelle, soucieuse de mettre à la disposition du plus grand nombre de praticiens des ouvrages de qualité. Elle s'adresse à tous les professionnels qui ont besoin d'une information fiable en droit, en économie ou en médecine. Command responsibility doctrine allows military commanders and civilian leaders to be held responsible for crimes committed by their subordinates. This form of responsibility has gained much attention in recent years, but it still presents several open questions and critical difficulties arise in its application. Chantal Meloni's in-depth study of the doctrine traces the roots of such criminal responsibility, from its military origins to its first appearances in the international case law after World War II. Particular attention is paid to the jurisprudence of the ad hoc Tribunals, which extensively elaborated on the issue, and to the provision of Article 28 of the ICC Statute. The systematic analysis of command responsibility outlines its different forms and finds it a proper role within the complex net of responsibilities related to the commission of international crimes. This volume illustrates to the public, and legal experts, the basic principles of the field of neuroscience, that commonly goes under the name of Neurolaw. First, it illustrates the relationship between neuroscience, natural sciences and social sciences. Furthermore, it highlights numerous problems concerning the fundamental philosophical concepts used by Neurolaw and evaluates the validity of the method and the limits of a neuroscientific approach to the problems of law and justice. The volume explores the possibility of application of these concepts on the fundamentals of the general theory of law and legal dogmatics. It also examines the main problems of Neurolaw in relation to public, private, criminal and procedural law. In conclusion, the book follows a systematic method that makes it an thorough manual for the introduction to Neurolaw.

Getting the books **Cedam La Responsabilit Penale E Civile Del Medico Di** now is not type of inspiring means.
