Apple has also released a new iMac (24-inch, 2021) with seven vibrant colors that count the days of the iMac G3 and show Apple's confidence and gameplay, which is to be welcomed. With a nice touch, the Magic Keyboard, Mouse and Trackpad are all the same color as the iMac, and the macOS Big Sur interface elements are the same color. This is a wonderful overall effect. The new iMac has succeeded in being almost as small (and thinner and lighter) than its larger predecessor, in large part because of the biggest change in the hood: it works with the Apple M1 chip instead of the Intel technology. The way was in the MacBook Air (M1, 2020), MacBook Pro 13-inch (M1, 2020) and Mac mini (M1, 2020), Apple's transition to its own silicon has been largely successful. The macOS Big Sur operating system is fast and agile, and the new apps designed for the M1 hardware work perfectly. Previous Intel-based apps equally works well with Apple's Rosetta 2

gadget, and you can also run iOS apps and games, giving you access to thousands of titles. Thanks to the excellent 4.5K Retina display, excellent speakers and fantastic webcam, it is a joy to work and create on the new iMac.
